ALTRIDER

How to apply Decals.

1. Prep the area. Clean the area with rubbing alcohol and ensure it is dry before applying the decal to the surface.
2. The decals are 3mil automotive grade vinyl. It is a tough and resilient material, but take care while applying, you can tear the decal if you are hasty.
3. Leave the decal in the premask and start by applying one corner of the vinyl. Slowly rub back and forth diagonally, applying pressure along the rest of the decal. This ensures no air gets trapped between the vinyl and the surface.

2 x 6.25 Inch AltRider Decal

One on each side of the gas tank

2 x 8.5 Inch AltRider Decal

One on each side of the swingarm

1 x 1.5 Inch A Logo Decal

Between open space on windscreen

1 x 1.5 Inch A Logo Decal

On the front of the fender

2 x 6.25 Inch AltRider Decal

On each side of the fender

Tip: If you end up with bubbles, use a little heat from a hair dryer to help push the bubbles down and/or out toward an edge.
