**Kit Contents:**

- ① Rack
- ② (4) Custom Spacers
- ③ (2) Elastomeric Bumper Stop,
- ④ (4) M6X1.0 X 30MM Torx Flat Head

**Recommended Tools:**

- ① T25 Torx
- ② T30 Torx
- ③ Driver or Ratchet
- ④ Flat blade screwdriver (optional)

- ① Using a T24 torx remove the 2 fasteners holding the cover on the underside of the BMW top case carrier. Save these fasteners.

- ② Remove the 2 BMW bump stops. Slide the rack to one side to make space and use a flat blade screw driver to pry them out. Save these in case you ever want to revert back to BMW stock. The AltRider bump stops can always be reverted.

- ③ Center the rack and slide in the AltRider bump stops on each side. Slide them in until they lock into place. This will stabilize the rack for improved luggage carrying. The AltRider bump stops can be removed at any point and the rack returned to its original functionality.

- ④ Using a T30 torx remove the 4 fasteners holding the plastic in place. Then place the 4 custom spacers with the shoulders facing down.

- ⑤ Place the AltRider rack in on the spacers and apply thread lock to the 4 flat head fasteners. Using a T30 torx tighten the fasteners to 10Nm (7 ft-lb)

- ⑥ Place the cover on the underside of the BMW back in place. Tighten the BMW fasteners using a T24 torx to 6Nm (4 ft-lb)

CONGRATULATIONS!

After 5 hours of riding, or 100 miles, check all the fasteners on the assembly to ensure they are tightened to spec.
